LAMININ

**Apostle
9 ~ 2009**

According to the encyclopedia Laminins are a family of proteins that are the integral part of the structural scaffolding of basement membranes in almost every tissue.

You see, Laminins are what holds us together. . . Literally! They are cell adhesion molecules. They are what holds one cell of our bodies to the next cell. Without them, we would literally fall apart. Look closely at the picture of Laminins, and this is not a Christian portrayal of it. If you look up Laminin in any scientific or medical piece of literature, this is what you will see.

**Your might want to Google it, on your computer,
Amazing, Isn't It?**

**The "glue" that holds us together is in the shape of a cross!
Colossians 1:15-17**

The Apostle Paul penned these words thousands of years before anyone knew anything about Laminin, and now, we see that from a very LITERAL standpoint, we are held together . . . one cell to another . . . by the cross. This is the "mark" of the Creator who knew exactly what laminin "glue" would look like, long before Adam even breathed his first breath.
